Brighter pools

*If only every pool was as crisp and bright
as an Aristone pool.*

Aristone is a wonderfully bright, durable, colourfast pool render that will transform your pool from ordinary to extraordinary.

Featuring a brilliant white base with ceramically fired colour flecks, Aristone makes your pool look crisp and inviting.

Crisp White

Brilliant Stone

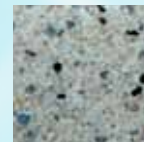

It's easy to spot an Aristone rendered pool – it's brighter, smoother, tougher and easier to maintain.

Aristone stays brighter longer

Most concrete and pebble pools use dyes to colour less durable stones. These exposed surfaces fade relatively quickly losing their brightness and hue as the pool's chemicals and harsh UV rays strip the colour from the render.

The colour in Aristone on the other hand, is made from ceramically fired stone particles which resist bleeding or fading - even when exposed to harsh sunlight, strong pool chemicals, and acid washings.

This means more fun in the water for you and less time spent trying to restore dull and unattractive surfaces.

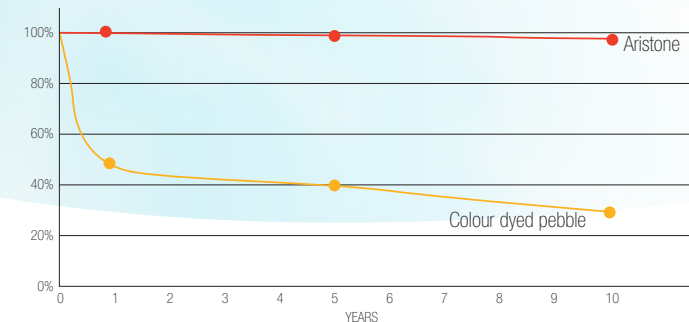

Rough, dyed stones fade, leaving a dull and lifeless looking pool.

Aristone's ceramic fired stones, crisp white base and smooth finish look greater for longer.

Graphic simulation of the effects of UV and chemical exposure over time

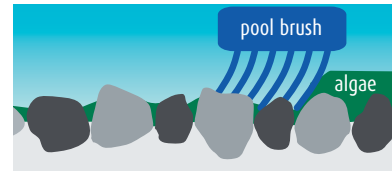

Fade resistance testing on Aristone ceramically coloured particles compared with colour dyed pebble using accelerated UV light and accelerated chlorine and acid levels.

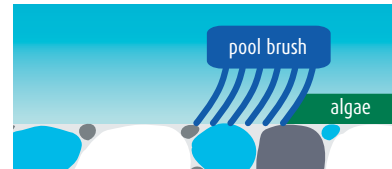

A smoother surface for improved comfort and maintenance

Traditional Pebbles

'Deep exposed' pebbles (where excess cement is removed with high pressure water) leaves deep valleys where dirt collects and pool cleaning devices can't reach.

Aristone

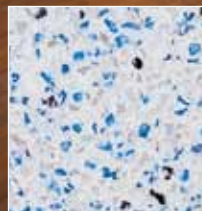

'Lightly exposed' stones (exposed with a gentle acid wash) leave a smoother, easier to clean surface.

Smoother pool surfaces are easier to keep clean because they don't have the "valleys" you might find in rougher surfaces. Valleys where your dirt and grime collect and where your pool cleaning devices struggle to reach.

Traditional pebble pools are finished using high pressure water to strip back a shallow layer of excess cement, leaving deep valleys exposed.

Aristone's smoother surface is thanks to a more refined technique which involves using a light acid wash to gently expose the rich colours and smooth surface.

Enticing mid blue tones are possible with Brilliant Blue.

Brilliant Blue

Durability and Toughness for Enduring Beauty and Brightness

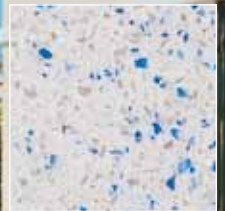

One of the main components of Aristone is the extremely tough natural stone, Quartz.

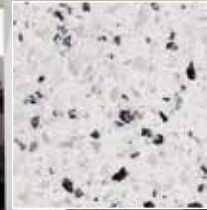

The Quartz components coupled with the tight matrix of white cement and other fine aggregates in Aristone give it a tough, solid surface, able to withstand the harsh conditions of a swimming pool.

This Crisp Blue pool glistens in the sun.

Crisp Blue

Brilliant Stone

Brilliant Stone provides a natural beach lagoon look.

Great for Pool Renovations too.

Aristone is not only a great choice for any new pool, it's also a fantastic pool renovation product. Aristone can be easily rendered over any existing concrete based pool to bring a dull and faded pool interior back to life. Aristone is so versatile it can be laid all the way up to existing tile bands and copings.

For more information on Aristone's bright range of pool interior renders visit www.aristone.com.au

Manufactured from a Name You Can Trust

Aristone is manufactured in Queensland by River Sands Pty Ltd - a company that has been actively involved in the Australian pool and construction industries since 1975.

River Sands Pty Ltd are leading manufacturers of concrete renders, concrete colour pigments and systems for colouring decorative concrete (www.concretecoloursystems.com.au), as well as an array of other cement based products for the construction industry.

Aristone's quality is guaranteed - thanks to our rigorous testing, research and manufacturing standards.

We offer a seven year manufacturer's warranty on the product and your pool builder will also offer a warranty on their workmanship.

Simply tell your pool builder that you have decided on the 'brighter choice' for your swimming pool and then sit back and enjoy your stunning new Aristone pool finish.

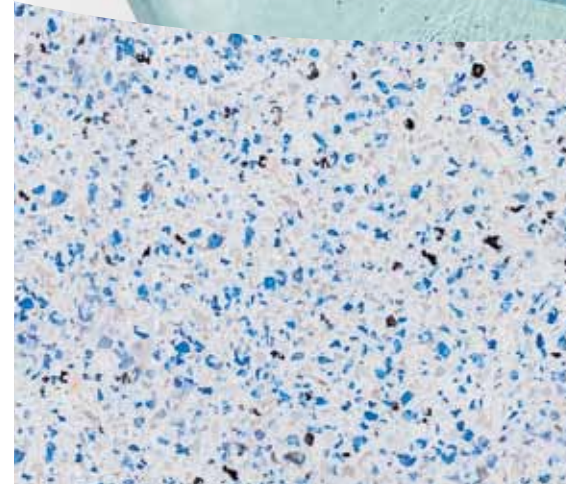

Aristone is pre-mixed and packaged, so your applicators need only add water. It is also your guarantee that you are getting a quality product you can trust.

Crisp Blue

This photo shows the striking tones of Crisp Blue in both shallow and deeper water.
